Languages & more

English

Cambridge Certificate of Proficiency

French

DEL F A1, A3, A4

Technical Chamber of Greece

Member as Electronic Engineer, 2003 – 2013

Military service

Completed, 2006 – 2007

Education

2002 – 2006

Technical University of Crete, Chania

MSc, School of Production Engineering & Management

Specialization: Business Organization & Management.

- Thesis: *Development of a web-based multi-criteria group decision support system.*
- Course average: 8.14 / 10.

2002 – 2005

Technical University of Crete, Chania

MSc, School of Electronic & Computer Engineering

Specialization: Communication Networks.

- Thesis: *Energy-Aware Scoping Algorithm and Energy Saving Techniques for Wireless Sensor Networks.*
- Course average: 9.63 / 10.

1996 – 2002

Technical University of Crete, Chania

Diploma in Electronic & Computer Engineering (5-year degree)

Grade: 7.99 / 10 ("Very Good").

- Thesis: *Development and performance study of an algorithm for guaranteed delivery of time-sensitive data flows in micro-cellular wireless networks* (graded 10 / 10).

Publications & awards

2004

WPMC '04 · Abano Terme, Italy

Publication

N. Kalogerinis & M. Paterakis, "Moving Cache Memory Architecture for Efficient Media Streaming Distribution over Wireless Domains". *Seventh International Symposium on Wireless Personal Multimedia Communications*, 11–14 September 2004.

2004

State Scholarships Foundation of Greece (IKY)

Award for excellence

Graduate program of the School of Electronic & Computer Engineering, Technical University of Crete (course average 9.63 / 10).

2003

Ericsson Southeast Europe

Ericsson Awards of Excellence in Telecommunications

2nd prize for the diploma thesis.

Teaching & research

Spring 2005

Technical University of Crete

Lecturer · Production Engineering & Management

Seminar course “Basic Internet Applications and Services”.

Spring 2005

Technical University of Crete

Instructor · General Department

Lab work, teaching and exams for the undergraduate courses “E-commerce and Computer Networks” and “Scientific Programming” (4th semester).

Fall 2005

Technical University of Crete

Instructor · General Department

Lab work, teaching and exams for the undergraduate course “Computer Programming” (2nd semester).

Mar – Jun 2006

Technical University of Crete

Research project “Q-Label”

Digitization of scientific material for an e-learning platform, on Internet Applications & E-commerce and Network Technologies.

Mar 2003 – Jan 2005

EOMMEX · Ministry of Development

Support & guidance associate, “Go Online” program

Trained staff of small and medium-sized businesses in Crete in internet and e-commerce technologies, helping them get online.

Sep 2003 – Jun 2004

Primary education

Computer science teacher (hourly)

Computer science in the all-day primary school program; 378 teaching hours.

Oct 1999 – Jun 2000

Technical University of Crete

Research project “EPET II – Logotypografia”

A Greek dictation system for newsroom workflows: speech recognition, language models, and processing of training samples in Greek.

Work experience

May 2010 – present

Bank of Greece

IT Department · Hardware & Operating Systems Support Section

Technical Consultant supporting the Bank's central computing system (mainframe) and its applications.

- IBM z/OS operating system support.
- Installation, configuration and maintenance of applications.
- Technical support of the MERVA / SWIFT FIN environment.
- Management of the backup environment.
- Support of the mainframe communications infrastructure (VTAM, SNA, TCP/IP).
- Management of storage subsystems (DS8700, TS7740) and the disaster recovery site.

Apr 2007 – May 2010

IBM Hellas

Infrastructure Specialist · Global Technology Services · IBM System z Product Services – Implementation

Technical specialist supporting IBM zSeries mainframe systems.

- z/OS support (up to V1R9) and its subsystems.
- Software installation and configuration through SMP/E; periodic product and function maintenance.
- Installation and migration of tape management subsystems (Automated Tape Libraries, Virtual Tape Servers B10/B18, TS7740 Virtualization Engines) and configuration of DFSMSrmm, DFSMSshsm and DFSMSdftp OAM.
- DFSMS configuration: data management policies, ACS routines, data set allocation and disk organization.
- z/OS network services: TCP/IP, FTP, SMTP, TN3270 server, SNA / Enterprise Extender, VTAM; OSA-Express (QDIO and non-QDIO), OSA-ICC and VIPA; equivalent services on z/OS UNIX System Services.
- IBM Global Training Services courses: CV86G DB2 V9 for z/OS Implementation Workshop · ES15G z/OS Concepts & Facilities · ES26G SMP/E for z/OS Workshop · SS84G DFSMS Implementation Workshop.

Feb 2006 – Feb 2007

Hellenic Army

Research & Informatics Corps (military service)

Computer networks and systems administration.

- 96th Higher Command, Chios, Brigade Research & Informatics Office: Windows Server 2003 domain with user levels, home folders, access hours and print server permissions; VLANs; backup domain controller (Active Directory replication) and antivirus server (McAfee AutoUpdate Architect) with automatic client updates.
- Hellenic Army General Staff IT Support Center, Athens: network administration (Windows 2003), active equipment, VLANs and antivirus server (McAfee ePO); backups of Windows 2003 Server and HP-UX systems. Simulation section: Linux network (Fedora Core 4 & 6), simulation applications, user groups, access levels and print server.

Jun – Aug 2005

Technical University of Crete

Laboratory instructor · General Department

Lab support for the undergraduate course “Scientific Programming”.

- Lab teaching; preparation of lab exercises and exams.
- Writing manuals, notes and teaching material.
- Participation in the department's examinations.

Nov 2003 – May 2005

Technical University of Crete

Full-time project contract · Applied Mathematics & Computers Lab, General Department

Project “Upgrading the Undergraduate Programs of the Technical University of Crete” (EPEAEK II, Measure 2.2).

- System administration on Solaris 9 & 10 with terminal clients.
- Network services (POP3, IMAP, Apache with SSL, MySQL) and supporting applications (webmail, anti-spam, content management systems).
- Installation and maintenance of MATLAB, Maple, C and Fortran on Solaris.
- Development and adaptation of the eClass e-learning platform.
- Websites of the General Department and the lab.
- Users, groups, access rights and addressing (static IPs and DHCP).
- MySQL administration, natively and through phpMyAdmin; backups of user data and databases.
